

CMM is one of the main European companies operating in the laser cutting field for other companies. It is specialized in laser cutting sheet steel and laser cutting tubular sections and steel profiles.

Sheet Steel Laser Cutting

For sheet steel laser cutting, we have installed 3 latest generation laser systems with a maximum working range of 4000x2000 mm and power ratings reaching 5200 Watt; these solutions mean that we can cut considerably thick material with great reliability and precision.

Sheet Steel Punching

For punching sheet steel CMM employs completely automatic machines which are flexible at the same time. The main characteristics of the machines installed are speed in executing job-orders and quality execution.

These systems are capable of creating all kinds of geometric shapes due to the flexibility of the rotating punches.

We are able to create deformations, indentations, semi-shears, dimpling on materials such as aluminum, brass, stainless steel, galvanized sheet, painted sheet and pickled sheet.

CMM works with these systems equipped with automatic loading, piece stacker, chipping separator and automatic unloading – day and night – in order to obtain very rapid delivery times.

Sheet Steel Bending

For bending sheet steel CMM employs numerical control bending machines with a maximum processing length of 4 meters and power of 320 tons.

Apart from traditional bending machines, CMM also has a completely automated work island; the main advantage of this system is that of working without the supervision of a person, thus considerably reducing processing costs. Another of the advantages is that of being able to handle delicate elements with suckers, thus avoiding any surface scratches or marks

Our laser machines

N° 3 Sheet steel laser cutting systems for sheets up to 4000X2000 MM .

N° 2 Sheet steel punching machines with automatic loading and unloading – maximum size 3000x1500 MM

N° 2 Robotized cells for automatic sheet bending

N° 6 Bending machines for semi-automatic sheet forming – maximum length 4 meters

Capabilities

<i>Materials</i>	<i>Max thickness</i>	<i>Max Dimensions</i>
Carbon steel sheets	20 mm	4000 X 2000 MM
Stainless steel	15 mm	4000 X 2000 MM
Aluminum	8 mm	4000 X 2000 MM
Brass	5 mm	4000 X 2000 MM
Hardox	15 mm	4000 X 2000 MM
Domex	20 mm	4000 X 2000 MM
Galvanised sheet	5 mm	4000 X 2000 MM

CMM....SPEAKS YOUR LANGUAGE !!!

We opened a commercial office to be able to follow all your needs, who we have people who speaks : English, German and French.

Our purpose is to help you in the purchase of our material, avoiding any kind of problem in understanding each other.

The contact person is : Mrs Sonia Beschi, e-mail : sonia.beschi@cmmlaser.it , mobile-phone +39 338 3660874

Services that we offer to our customers :

- projects for steel structures
- deliveries all around the world

Provided guaranties :

- ISO 9001:2000 certification, starting from 1996
- certification for the employed raw material
- Guaranty for the continuity of the produced material

References :

- we are following more that 3.000 customers in Europe and North Africa.

We invite you therefore to visit our website to know more about us. Our address is:
